

Bracelet Size Guide
For Moments That Matter

## Bracelet Size Guide

## Finding the correct bracelet size is important

 Finding the correct bracelet size is important because it ensures comfort, prevents the bracelet from being too tight or too loose, enhances the aesthetic appeal when worn, and reduces the risk of damage or loss. However, since most bracelets open and close with size-adjustable clasps, an approximate bracelet size will work too. Follow our size guide to help determine your perfect size. If you have any questions at all, you can always contact our customer care executives.
## Bracelet size and fit:

In general, we can divide bracelet fits into snug, comfortable and loose. The general rule of thumb to get your best fit is to include this factor along with your measured wrist size and then choose the size accordingly from the Firefly Bracelet size chart.

- If you like to wear your bracelet snug around your wrist, you like it quite tight. Choose the size closest to your wrist measure from the size chart. This is the right size for bracelets that are styled to be worn snugly.
- If you want a comfortable fit with enough room to pass your little finger all around, then you should go for the next bigger size range on the size chart. This is the right size for tennis, gemstone or chain bracelets.

## Measuring your bracelet size:

To find your bracelet size, you can measure your wrist size or a favourite bracelet that you already have!

## How to measure your wrist siz: e

Step 1: Wrap a tape measure around the wrist bone, so that it fits snugly without feeling too tight or too loose.
Step 2: Mark where the tape measure overlaps. This is the exact circumference of your wrist.

Note: You can substitute the measuring tape with a string or ribbon too. Use a ruler to measure the length from the point of overlap to the end.

## How to measure a bracelet you already own:

Step 1: Open your bracelet and place it straight on the table
Step 2: Using the centimetre/inch edge of a ruler, measure the length of the bracelet chain from the outer edge of the clasp to the other end of the bracelet.
